🌟 OBJECTIVE

Applying For A Front-End Developer(Next.js) Job Position Where My Experiences May Be Utilized And Strengthen My Team Work Collaboration.

🎓 EDUCATION

Student At BNUT - Babol Noshirvani University Of Technology

2022-Present

- Teaching Assistant: Web Programming

🚀 EXPERIENCE

Next Js Developer | 123Health

Implemented using Next.js and Antd 🐯

this company is located in the United States. Its website is designed for multiple types of users (patients, medical providers, etc.), allowing them to manage their health and prescriptions through this system.

♦ Live : [Under Development](#) | GitHub: [Source Code\(Private\)](#)

Front-End Developer | Melting Bear(Game)

implement by React, Tailwind, TypeScript, and Web3 technology.

The login feature connects users through their Web3 wallets. This website features a pixelated game where you can farm plants and earn cash by helping the environment.

♦ Live Demo: [Game](#) | GitHub: [Source Code\(Private\)](#)

NextJS Developer | Online Store (Telegram Mini App)

Implemented using Next.js, TypeScript, Antd 🐯, and Telegram Script.

this website is a store where you can buy online products such as gift cards, accounts, game top-ups, and more.

♦ Live Demo: [Store](#) | GitHub: [My Articles Related To This Tech](#)

Front-End Developer | Siaj

Implemented using Next, Tailwind, and MUI.

this website is designed for showing and managing various aspects of the main company, including employee lists, projects, and social addresses.

♦ Live : [Siaj Studio](#) | GitHub: [Source Code\(private\)](#)

🔧 SKILLS

- Bootstrap, Tailwind And Materialize Framework
- Skills In Git And Remote Git Repositories (GitHub)
- React.js Library (Mid-Level)
- Next.js Library (Junior Level)
- TypeScript Development
- A Bit Of Backend And Database

Creating APIs using FastAPI and Python, with MongoDB and SQLite.

- WordPress

Got some teaching chops too! I've taught WordPress at MU.BABOL

Telegram Bots And TMA

Using grammY and Telegram Script, I made some bots for online stores, some religious ceremony, and connecting Mini App to them.

- Telspace: [@TelSpace_bot](#)
- Quran: [@qoran_finisher_bot](#)
