I am a dedicated Front-End Developer (**Mid-level**) specializing in **Next.js, React.js, TypeScript**, and contemporary web technologies. Passionate about developing responsive, interactive, and user-centric web applications, I consistently strive to craft innovative solutions that deliver impactful results. My passion for web development started in seventh grade, fueling continuous growth and dedication ever since.

Work Experience

Mid-Level FrontEnd Dev ⚒️   **Spira Ai**   **Oct 2024 – Present**
Remote   USA

- Handled and visualized large datasets effectively with D3.js and Highcharts for insightful analytics.
- Dynamically manipulated extensive datasets, optimizing performance and responsiveness.
- Enhanced website functionality and maintainability through advanced use of React functions and hooks.

Junior FrontEnd Dev ⚒️   **123 Health App**   **Oct 2023 – Sep 2024**
Remote   USA

- Developed interactive healthcare solutions using Next.js, enabling seamless user experience and intuitive data visualization.
- Implemented responsive UI components with Ant Design, delivering user-friendly navigation and functionality
- Created clear, structured component and sequence **diagrams** to visualize system interactions and workflows, ensuring clarity in system design and efficient team collaboration.
- **Implemented a multitier system architecture**, separating responsibilities across different layers (presentation, business logic, data), enhancing maintainability, scalability, and security of the application.

Junior FrontEnd Dev ✅   **Melting Bears**   **Side Project (Freelance)**
Tehran, Iran

- Developed "Melting Bears," an interactive, gamified web application built using Next.js, TypeScript, and Tailwind CSS, featuring Web3 integration and pixelated gaming experiences.
- Here is the demo for entering without a whitelist: https://melting-bear.netlify.app 📦

WordPress Instructor   **Babol University of Medical Sciences**   **Winter 2023**
Babol, Iran

- Developed effective communication techniques for clearly transferring complex ideas in an understandable manner.
- Improved my interpersonal and public-speaking abilities, becoming proficient at clearly explaining technical concepts.

Education and Certifications

- **B.Sc. Computer Engineering,** Babol University of Technology, Iran.   **2022–Present**
- **Teacher Assistant,** Web Programming

Technologies and Languages

- Languages: HTML, CSS, Javascript (Node.JS), Java , Typescript
- Technologies: React.js, Next.js, MySQL, MongoDB, Postgres, Git
- Libraries: Antd, GSAP, MUi, Tailwind, GrammY & Pyrogram (Telegram Bots)
