PROFILE

Front-End developer specializing in Next.js, React and TypeScript. I build websites, dashboards, Telegram Mini Apps and Telegram bots, and I've worked remotely with US teams since 2023 on data-heavy products, system design and AI agents. Since spring 2026 I develop through Claude Code agents, with custom skills and workflows that keep their output in line with each project's conventions. I started web programming in seventh grade and haven't stopped since.

EXPERIENCE

Front-End Developer, Mid-Level

Oct 2024 – Present

Private Company · Remote, USA

- Turn large datasets into charts and analytical reports with D3.js and Highcharts.
- Process big datasets in the browser while keeping pages fast and responsive.
- Made the codebase easier to maintain with advanced React hooks and patterns.
- Since spring 2026, moved the team's development to Claude Code: features, refactors and bug fixes are all done through agents, with no code written by hand.
- Built custom Claude Code skills and workflows so the agents' output follows the project's conventions.

Founder & Developer · nimbyte

Present

Studio for websites, dashboards, Telegram Mini Apps and bots · `nimbyte.ir`

- Built nimbyte.ir with Next.js, Tailwind CSS and Prisma on PostgreSQL: a bento-grid site with a price calculator that orders through Telegram, a shop with online payment, a blog and portfolio written in a rich-text admin panel, and SEO from the first audit on.
- Design and ship Telegram bots on Telegram Serverless with React Mini Apps, admin panels, widgets, offline tests and deploys on GitHub Actions.
- Run the brand end to end: its design system, character (Bitty), copy and content.

Front-End Developer, Junior

Oct 2023 – Sep 2024

123 Health App · Remote, USA

- Built interactive healthcare tools with Next.js, with a smooth user experience and clear data visualization.
- Implemented responsive UI components with Ant Design for easy navigation.
- Drew component and sequence diagrams so the whole team understood how the system's parts interact.
- Implemented a multi-tier architecture separating presentation, business logic and data, for easier maintenance, growth and security.

EXPERIENCE, CONTINUED

Front-End Developer, Junior

Freelance

Melting Bears · Tehran, Iran

- Built an interactive, gamified web app with Next.js, TypeScript and Tailwind CSS, with Web3 wallet sign-in and a pixel-game feel. Demo without whitelist ↗

WordPress Instructor

Winter 2023

Babol University of Medical Sciences · Babol, Iran

- Learned to explain complex technical ideas simply and clearly, as I do with clients now.
- Practised presenting and speaking to a group.

SELECTED WORK · LIVE BOTS AND APPS

AdsProvider

Telegram bot for ordering Telegram Ads: a toman wallet (card-to-card, TON, USDT), a three-step order, review and publishing through the Telegram Ads API, reports with charts, chat widgets and a React Mini App.

nimbyte.ir/portfolio/adsprovider-bot

Soundgir

SoundCloud downloader bot: links or song names, Spotify and YouTube links matched on SoundCloud, tags and covers written into the file, a Playlist Mini App with a streaming player and a Telegram widget.

nimbyte.ir/portfolio/soundcloud-downloader-bot

Nakoja

Online shop demo, from product page to seller panel: cart, checkout, order tracking and stock management.

nimbyte.ir/portfolio/nakoja-online-shop

LikeTune & Hesabdar

LikeTune: likes and stats for music channels. Hesabdar: an inline calculator and currency converter that works in any chat.
